PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in security research, SOC operations, penetration testing, vulnerability assessment, and threat analysis. Currently working as a Cyber Security Researcher Intern, contributing to cybersecurity research and security assessment activities through vulnerability research, emerging threat analysis, security tool evaluation, threat intelligence, and technical documentation. Actively engaged in bug hunting and responsible vulnerability disclosure programs, with experience identifying and reporting security vulnerabilities to organizations and receiving Hall of Fame recognition for valid security findings. Skilled in security monitoring, incident response, SIEM, web application security, threat intelligence, and cybersecurity tools. Strong analytical and problem-solving abilities, committed to continuously enhancing my knowledge and skills while contributing effectively to the organization's security objectives and overall growth.

PROFESSIONAL EXPERIENCE

Cyber Security Researcher Intern – Encrypt Bytes | July 2026 - Present

- Assisted with vulnerability analysis, security assessments, and evaluation of security tools and frameworks.
- Conducted cybersecurity research using threat intelligence, vulnerability databases, and industry-standard resources.
- Maintained structured technical documentation and research records to support project activities.
- Performed security testing and research related to OWASP Top 10, web application security, and network security.
- Collected, validated, and organized security research data and findings for ongoing projects.
- Collaborated with mentors and team members on cybersecurity research and security assessment activities.
- Monitored and analyzed LAN, WAN, and wireless network infrastructure to identify connectivity, performance, and potential security issues.
- Configured and managed routers, switches, firewalls, access controls, and network security configurations.
- Assisted in implementing firewall rules, access control mechanisms, security updates, and network security policies.

TECHNICAL SKILLS

Networking & Network Security: TCP/IP, DNS, DHCP, Routing & Switching, Firewalls, VPNs, Network Security, IDS/IPS, ARP Spoofing, Packet Sniffing, Network, Troubleshooting, Access Control.

Vulnerability Assessment & Penetration Testing : Kali Linux, Burp Suite, Nmap, Metasploit, SQLMap, Nikto, Hydra, John the Ripper, OWASP Top 10, Vulnerability Assessment, Exploitation, Exploit Development.

RedTeam & Post-Exploitation: Red Team Infrastructure, Initial Access, Active Directory (AD) Attacks, Lateral Movement, Privilege Escalation, Meterpreter, Persistence Techniques.

SOC Operations & SIEM Tools: Splunk, Wazuh, Wireshark, Snort, IDS/IPS, Endpoint Detection & Response (EDR), Threat Hunting, Threat Intelligence, Malware Analysis, Incident Response, Security Incident Triage.

Wireless Security: Aircrack-ng, Wifite, Reaver, Wireless Network Testing, Wireless Attacks.

Operating Systems: Windows, Windows Server, Linux (Ubuntu, Kali Linux).

Security Knowledge: OWASP Top 10 Vulnerabilities & Mitigation Strategies, Malware Analysis, Threat Intelligence, Network Security, Security Testing Methodologies.

Scripting & Automation: Python, Bash

PROJECTS

Subs-Recon — Automated Subdomain Enumeration Tool

- Developed an CLI-based all-in-one subdomain enumeration tool in Bash, that integrates multiple passive reconnaissance sources and locally installed tools including Subfinder, Amass, Assetfinder, Findomain, Sublist3r, and Waybackurls.
- Implemented automated hostname extraction, validation, normalization, target-scope validation, and deduplication to produce clean subdomain results.
- Added support for single-domain and multi-domain enumeration, configurable timeouts, dependency checking, and CLI-based operation.
- Built for penetration testing and bug hunting reconnaissance to automate external attack-surface discovery.

URLenum — Multi-Source URL Enumeration Tool

- Developed an all in one Go-based URL enumeration tool for web security reconnaissance and bug hunting.
- Automates URL discovery from multiple public and historical sources,including GAU, Waybackurls, Waymore, Katana, Hakrawler, and Wayback Machine CDX.
- Collects current, archived, and previously indexed URLs from target domains.
- Identifies parameterized URLs and historical endpoints to expand the web attack surface.
- Supports multi-source and multi-target URL enumeration with structured output.

Anomaly Detection

- Developed an Anomaly detection system to monitor surveillance footage and automatically identify suspicious activities.
- Designed and trained a deep learning model to detect events such as explosion, drug usage, robbery, and physical fighting.
- Implemented real-time face detection from recorded video streams to enhance identity-based tracking.
- Reduced manual video monitoring efforts by automating detection and generating instant alerts with event classification.

TRAINING AND CERTIFICATIONS

Certified Ethical Hacker (CEH) | EC-Council

Advanced Diploma in Cyber Defense | Red Team Hacker Academy

Foundation Level Threat intelligence Analyst | ArcX Cyber Security

API Security Fundamentals | APISEC University

EDUCATION

Bachelor of Computer Application (BCA)

University Of Calicut | 2020 – 2023

Advanced Diploma in Cyber Defense

Red Team Hacker Academy | 2023 – 2024

KEY STRENGTHS

- Familiar with web application security testing, vulnerability assessment, and secure development practices.
- Strong knowledge of SOC operations, incident response, and security monitoring.
- Experienced in SIEM monitoring, threat detection, alert triage, and event correlation using Splunk.
- Skilled in log analysis, IOC identification, and security incident investigation.
- Strong analytical, problem-solving, and technical documentation skills.

LANGUAGES

English (Fluent) | **Malayalam** (Native) | **Tamil** (Intermediate) | **Hindi** (Basic)

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
